China is rising. Under President Xi Jinping, the country has become more assertive on the world stage, and its economy has grown at an unprecedented pace. But what does this mean for China's future? And what does it mean for the rest of the world?

In his new book, *Dispatches From The Frontline Of Xi New China*, Evan Osnos provides a gripping account of the rise of China under Xi Jinping. Osnos, a Pulitzer Prize winner, spent years reporting from China, and he provides a unique perspective on the country's transformation.

Osnos's book is not a simple recitation of facts and figures. It is a deeply reported and nuanced account of the human side of China's rise. Osnos tells the stories of ordinary Chinese people who are struggling to make a living, and he provides a glimpse into the lives of the country's elite.

Osnos also provides a clear-eyed assessment of Xi Jinping's leadership. He argues that Xi is a strong and decisive leader, but he also acknowledges that Xi's authoritarianism has come at a cost. Osnos writes that "Xi's China is a place where dissent is stifled, and where the government's surveillance of its citizens is pervasive."

Despite the challenges, Osnos remains optimistic about China's future. He writes that "China is a country with a long and rich history, and it has the potential to be a great power for good in the world."

Dispatches From The Frontline Of Xi New China is an essential read for anyone who wants to understand China's rise. It is a gripping account of the country's transformation, and it provides a unique perspective on the challenges and opportunities that lie ahead.
