

# How Big Government Liberals Wrecked The Global Economy And How They Will Do It Again

The global economy is in shambles, and big government liberals are to blame. They have wrecked the economy with their reckless spending, their over-regulation, and their anti-business policies. And they will do it again if we let them.

## Architects of Ruin: How Big Government Liberals Wrecked the Global Economy--and How They Will Do It Again If No One Stops Them by Peter Schweizer

Here's a look at how big government liberals have wrecked the global economy:

1. **Reckless spending:** Big government liberals love to spend money. They spend it on everything from social programs to infrastructure projects to foreign aid. And they don't care where the money comes from. They just borrow it and pass the debt on to future generations.

2. **Over-regulation:** Big government liberals love to regulate businesses. They regulate everything from the food we eat to the air we breathe to the prices we pay. And their regulations are often so complex and burdensome that businesses can't afford to comply. This stifles economic growth and job creation.
3. **Anti-business policies:** Big government liberals are hostile to business. They see businesses as greedy and exploitative. And they enact policies that make it difficult for businesses to operate and succeed. This discourages investment and job creation, and it drives businesses overseas.

The result of big government liberalism is a global economy that is in shambles. Debt is skyrocketing, deficits are out of control, inflation is rising, unemployment is high, and poverty is widespread. And it's only going to get worse if we don't stop big government liberals.

Here's what we need to do:

1. **Cut spending:** We need to cut government spending. We can't afford to keep borrowing money and passing the debt on to future generations.
2. **Reduce regulation:** We need to reduce government regulation. We need to make it easier for businesses to operate and succeed. This will encourage investment and job creation.
3. **Support businesses:** We need to support businesses. We need to create a pro-business environment that encourages investment and job creation.

If we do these things, we can turn the global economy around. We can create a more prosperous future for ourselves and our children. But we need to act now. We can't afford to wait any longer.
