Step-by-Step Guide to Pi Planning

Safe Pi Planning Step-by-Step Guide provides a detailed roadmap for successful Pi Planning, covering each step in depth:

Step 1: Preparation

- Define the purpose and scope of the Pi Planning event.

- Identify the participants and their roles.

- Gather necessary data and materials.

Step 2: Backlog Refinement

- Review and refine the product backlog, ensuring it is clear, prioritized, and sized appropriately.

- Identify dependencies and risks associated with backlog items.

- Estimate the effort and duration of each backlog item.

Step 3: Iteration Planning

- Divide the project into iterations, typically lasting 1-4 weeks.

- Plan the work to be completed in each iteration, considering team capacity and workload.

- Establish clear goals and acceptance criteria for each iteration.

Step 4: Risk Identification and Mitigation

- Identify potential risks that could impact the project or iteration plans.

- Develop strategies to mitigate or eliminate identified risks.

- Assign responsibility for risk monitoring and mitigation.

Step 5: Plan Synchronization

- Synchronize team plans to ensure alignment and avoid conflicts.

- Identify dependencies between teams and establish mechanisms for collaboration.

- Create a master plan that integrates all team plans.

Step 6: Plan Review and Approval

- Review the Pi Plan with stakeholders and obtain approval.

- Communicate the plan to the team and ensure everyone understands their roles and responsibilities.

- Track progress and make adjustments as needed throughout the project.
